Contribution of Mine-Derived Airborne Particulate Matter to Ca, Fe, Mn and S Content and Distribution in the Lichen *Punctelia hypoleucites* Transplanted to Bajo de la Alumbra Mine, Catamarca (Argentina)
Hernández, J.M., de la Fournière, E.M., Ramos, C.P. et al.
Arch Environ Contam Toxicol 86, 140–151 (2024).

The relevance of extra framework Al in the crystallisation of α -Fe₂O₃ nanocrystals over ZSM-5 as photo-Fenton catalyst
Ariel Vinuesa, Luciana Bonetto, Cinthia Paula Ramos, Clara Saux.
Microporous and Mesoporous Materials Volume 379, November 2024, 113287

Enhanced mineralization of bisphenol A by electric arc furnace slag: Fenton-like oxidation
Natalia Soledad Inchaurredo, Franco Bocero, Cinthia Paula Ramos, Trinidad Freije, Laura Alejandra Fasce.
Applied Catalysis O: Open Volume 193, August 2024, 206971

Wettability, imbibition and interdiffusion of lithium-based water-in-salt electrolytes in nanoporous carbon in relation to energy storage: A neutron radiography study
Federico M. Cabello, Gabriela Horwitz, Aureliano Tartaglione, Michael Schulz, Julio H. Marin, Abigail Rozenblit, Mario A. Trejo Urdaneta, Marina S. Bellora, Federico A. Viva, Horacio R. Corti
Carbon Volume 228, September 2024, 119292

Study of restricted diffusion of lithium salts in diglyme confined in mesoporous carbons as a model for cathodes in lithium–air batteries
Santiago A. Maldonado-Ochoa, Eduardo Fuentes-Quezada, Ivette Angarita, Matías H. Factorovich, Mariano M. Bruno, Rodolfo H. Acosta, M. Paula Longinotti, Fabián Vaca Chávez, Ezequiel de la Llave and Horacio R. Corti
Phys. Chem. Chem. Phys., 2024,26, 22696-22705

Characterization of SiPM performance in a small satellite in low earth orbit using LabOSat-01
Lucas Finazzi, Federico Izraelevitch, Mariano Barella, Fernando Gomez Marlasca, Gabriel Sanca, Federico Golmar
Nuclear Instruments and Methods in Physics Research Section A: Accelerators, Spectrometers, Detectors and Associated Equipment; Volume 1067, 2024, 169711

Total ionizing dose measurements in small satellites in LEO using LabOSat-01
Lucas Finazzi, Mariano Barella, Fernando Gomez Marlasca, Lucas Sambuco Salomone, Sebastián Carbonetto, María Victoria Cassani, Eduardo Redín, Mariano García-Inza, Gabriel Sanca, Federico Golmar
Nuclear Instruments and Methods in Physics Research Section A: Accelerators, Spectrometers, Detectors and Associated Equipment; Volume 1064, 2024, 169344

LabOSat-01: A Payload for In-Orbit Device Characterization
G. A. Sanca; M. Barella; F. Gomez Marlasca; N. Alvarez; P. Levy; F. Golmar
IEEE Embedded Systems Letters (Volume: 16, Issue: 1, March 2024)

Enhancing the Supercapacitive Behaviour of Cobalt Layered Hydroxides by 3D Structuring and Halide Substitution
Álvaro Seijas-Da Silva, Víctor Oestreicher, Cristián Huck-Iriart, Martín Mizrahi, Diego Hunt, Valeria Ferrari, Gonzalo Abellán
Batteries & Supercaps 2024, 7, e202400335

Proton quantal delocalization and H/D translocations in (MeOH)_nH⁺ (n = 2, 3)
Emilio Méndez, Daniel Laria, Diego Hunt
J. Chem. Phys. 161, 174303 (2024)

In Situ SAXS Study of the Formation of Aluminum Hydroxide-Based Hydrogels with Excellent Optical Properties
Gustavo M. Segovia, Patricia Rivas-Rojas, Mercedes Perullini, Matías Jobbágy, Paula C. Angelomé, Cristián Huck-Iriart, Víctor Oestreicher
J. Phys. Chem. C 2024, 128, 25, 10586–10594

Magnetic transition and spin-polarized two-dimensional electron gas controlled by polarization switching in strained CaMnO₃/BaTiO₃ slabs
S. Di Napoli, A. Román, A. M. Llois, M. H. Aguirre, L. B. Steren, and M. A. Barral
Phys. Rev. Materials 8, 034408, 2024

Magnetocaloric effect of nanostructured La_{0.6}Sr_{0.4}CoO₃
Fabiana Morales Alvarez, María Belén Vigna, Mariano Quintero, Diego G. Lamas, Joaquín Sacanell
Journal of Alloys and Compounds, Volume 970, 2024, 172507

Magnetic structure and component-separated transitions of HoNiSi_3
R. Tartaglia, F. R. Arantes, C. W. Galdino, U. F. Kaneko, M. A. Avila, E. Granado, Veronica Vildosola, Matias Nuñez,
Pablo S. Cornaglia
Phys. Rev. B 109, 144402 (2024)

Arsenite removal by using ZnAlFe mixed metal oxides derived from layered double hydroxides
Luis A. May Ix, Sandra Cipagauta Díaz, Francisco Tzompantzi, Raúl Pérez Hernández, Jorge M. Meichtry, Emilia B.
Halac g, Marta I. Litter
Chemosphere, Volume 368, (2024) 143694

Layer-by-layer degradation method for profiling MAPbI_3 thin films by a fast photo-oxidative process using high-energy
UV irradiation
J. Caram, M. Senno, V. A. Gómez Andrade, M. D. Perez, S. Tinte, and R. Urteaga
Phys. Rev. Materials 8, 115403, 2024

VIII Symposium on Hydrogen and Fuel Cells (HYCELTEC 2022): Foreword
Horacio R. Corti, Ernesto J. Calvo
Electrochimica Acta, Volume 476, 1 February 2024, 143719
